1. What is the primary purpose of using calculated fields in Google Looker Studio?

1 / 1 point

- ☐ To filter data based on user interactions.
- ☐ To summarize key metrics briefly in dashboards.
- ☒ To perform complex calculations within the tool for deriving new metrics.
- ☐ To connect to different data sources.

✓ **Correct**

Correct! Calculated fields are used to create new metrics from existing data through custom formulas.

2. Which feature in Google Looker Studio allows users to explore data subsets without altering the underlying datasets?

1 / 1 point

- ☐ Scorecards
- ☐ Calculated fields
- ☒ Dynamic filtering
- ☐ Data sources

✓ **Correct**

Correct! Dynamic filtering allows users to alter the data displayed in the dashboard based on predefined criteria or interactions.

3. What is the first step in starting a new dashboard in Google Looker Studio?

1 / 1 point

- ☐ Creating a bar chart.
- ☒ Signing into Google Looker Studio.
- ☐ Setting up filters.
- ☐ Accessing the dataset.

✓ **Correct**

Correct! The first step is to sign into Google Looker Studio.

4. Which visualization type is specifically mentioned as being used for displaying proportionate data?

1 / 1 point

- ☐ Scorecards
- ☒ Pie charts
- ☐ Line charts
- ☐ Horizontal bar charts

✓ **Correct**

Correct! Pie charts are used to display proportionate data effectively.

5. What should you do to maximize the effectiveness of the hands-on lab?

1 / 1 point

- ☐ Start directly with advanced features without a basic review.
- ☐ Avoid using dynamic filters in your dashboards.
- ☐ Only focus on creating calculated fields.
- ☒ Review basic concepts and familiarize yourself with Google Looker Studio's interface.

✓ **Correct**

Correct! Reviewing basic concepts and becoming familiar with the interface is recommended to maximize lab effectiveness.

6. What is the role of scorecards in Google Looker Studio dashboards?

1 / 1 point

- ☐ To connect multiple data sources.
- ☒ To display real-time changes in data metrics.
- ☐ To manage user permissions and access.
- ☐ To create dynamic filters for dashboards.

✓ **Correct**

Correct! Scorecards are used to summarize key metrics and can reflect real-time data changes in dashboards.
